Projects

CarMart | <https://github.com/jhlanger/Group-Project-2> | <https://gp2carmart.herokuapp.com/>

- CarMart is a platform for users to buy and sell used cars in an easy fashion.
- This app allows users to post their cars and for buyers to view and contact the users to negotiate and purchase used vehicles. It uses many full stack components allowing the user to log in and out, create accounts, post and sell cars and update and delete their posts.
- HTML, CSS, MySQL, Bootstrap, JavaScript, Express, Node, Heroku, Bcrypt, Dotenv

Project Name | **Repo** | **Deployed**

Role in Project

- 1-liner - What does the app do?
- 1-2 sentences on what the project accomplishes and your responsibilities
